

### **CORONA VIRUS IMPORTANT INFORMATION**

Do you believe your government is telling the truth about the ‘virus?’  
Many people don’t.

Government advice is irrelevant and contradictory.

The COVID virus is no more infectious or dangerous than other similar viruses.

The ‘test’ for COVID is unreliable,  
Therefore statistics on numbers of cases are unreliable.

Many people believe the current lockdown measures are totally unnecessary.

People who have been ill for many months that have died of natural causes  
are being wrongly classed as “Corona” deaths. This is fraudulent.

Excess mortality rates for COVID-19 are low – or even non-existent.

A group which includes Bill Gates and his foundation appeared to know that a  
pandemic was going to be declared before the virus outbreak.

The same group appears to have a “business interest” in a global vaccination  
programme, which could be coupled with a “biometric immunity passport” that  
may be used to dictate an individual’s freedom of travel and association.

Compulsory lockdown and restrictions of movement  
are a violation of human rights.
